

Django 서버 실행하기

의존성 설치

`pyproject.toml`, `uv.lock` 에 정의된 패키지를 가상환경(`.venv`)에 설치합니다.

```
uv sync
```

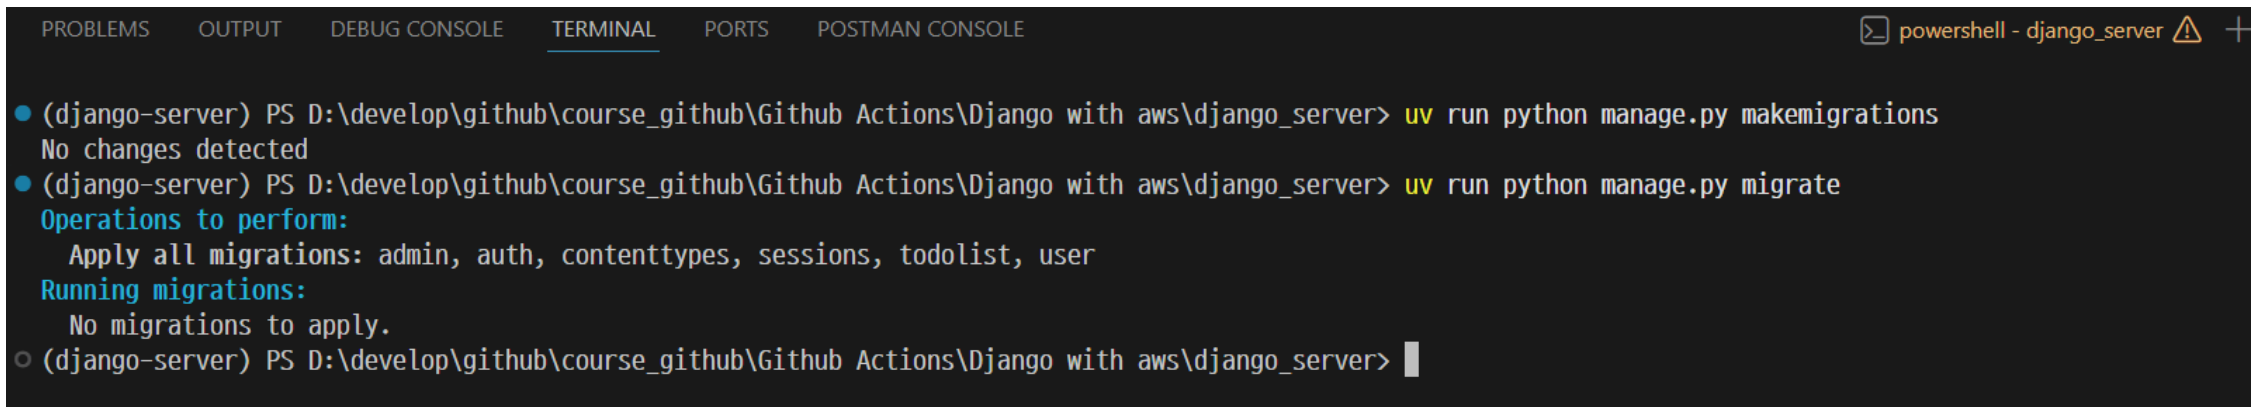

The screenshot shows a VS Code interface with a terminal window open. The terminal title is 'powershell - django_server'. The terminal content shows the execution of the 'uv sync' command in a PowerShell prompt. The output indicates that 7 packages were resolved in 0.89ms and 6 packages were audited in 0.43ms. The prompt then returns to the user.

```
PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS POSTMAN CONSOLE powershell - django_server ⚠ + - 🗑  
• (django-server) PS D:\develop\github\course_github\Github Actions\Django with aws\django_server> uv sync  
  Resolved 7 packages in 0.89ms  
  Audited 6 packages in 0.43ms  
○ (django-server) PS D:\develop\github\course_github\Github Actions\Django with aws\django_server> █
```

데이터베이스 마이그레이션

```
# models.py 변경 사항을 감지해 마이그레이션 파일 생성
uv run python manage.py makemigrations
# 마이그레이션 파일을 실제 데이터베이스에 반영
uv run python manage.py migrate
```

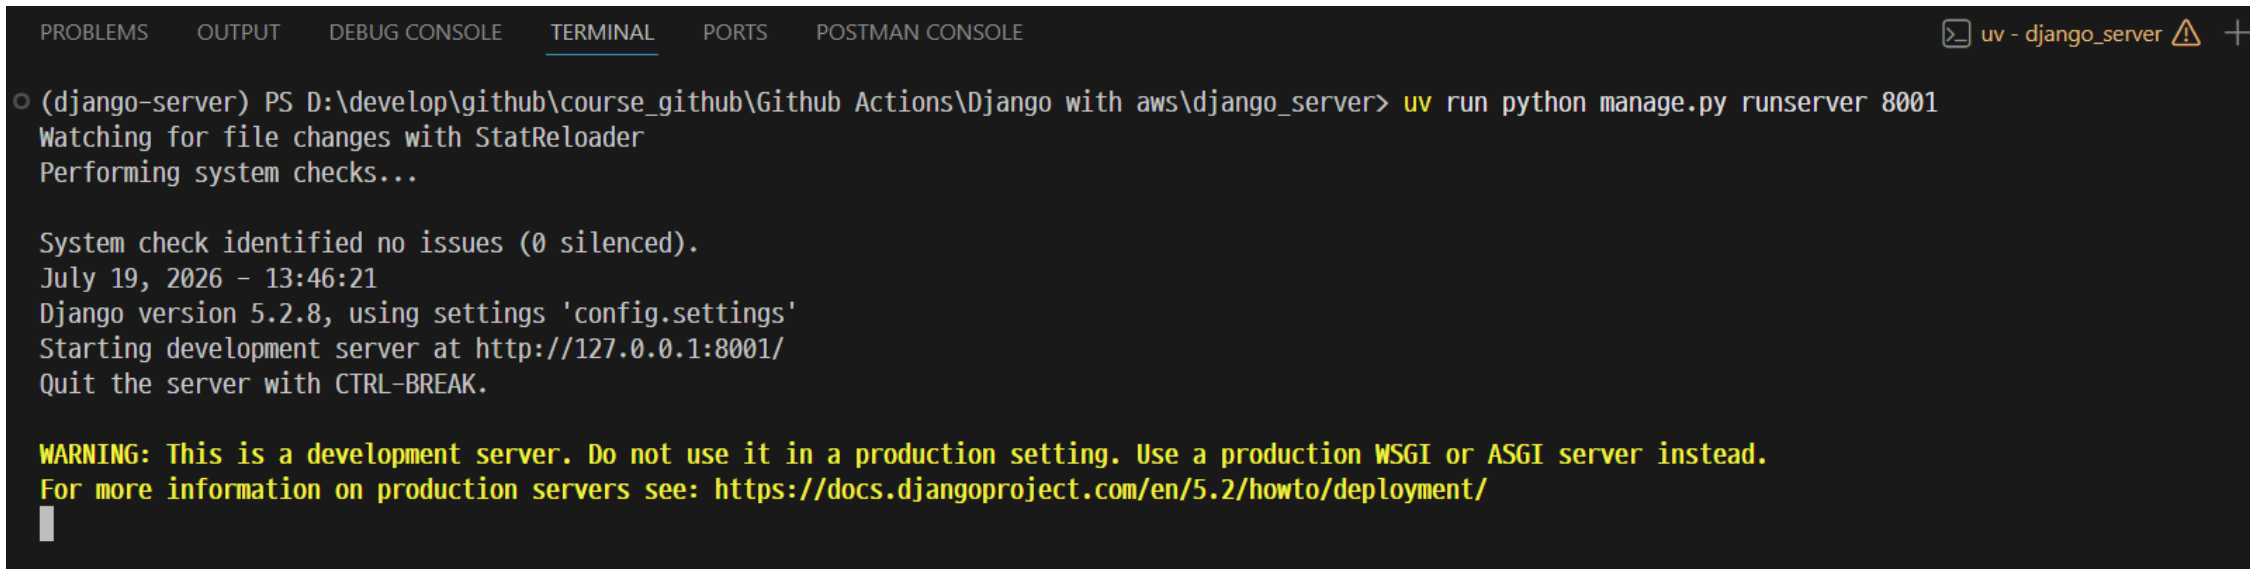

The screenshot shows a VS Code terminal window with the title bar "powershell - django_server". The terminal has tabs for "PROBLEMS", "OUTPUT", "DEBUG CONSOLE", "TERMINAL" (which is active), "PORTS", and "POSTMAN CONSOLE". The terminal content shows two commands being executed in a PowerShell prompt:

- (django-server) PS D:\develop\github\course_github\Github Actions\Django with aws\django_server> uv run python manage.py makemigrations
No changes detected
- (django-server) PS D:\develop\github\course_github\Github Actions\Django with aws\django_server> uv run python manage.py migrate
Operations to perform:
 Apply all migrations: admin, auth, contenttypes, sessions, tolist, user
Running migrations:
 No migrations to apply.

The third line shows the prompt again without output: ○ (django-server) PS D:\develop\github\course_github\Github Actions\Django with aws\django_server> |

개발 서버 실행

```
# 8000번 포트가 이미 사용 중이라면 8001 등 다른 포트로 실행
uv run python manage.py runserver 8001
```

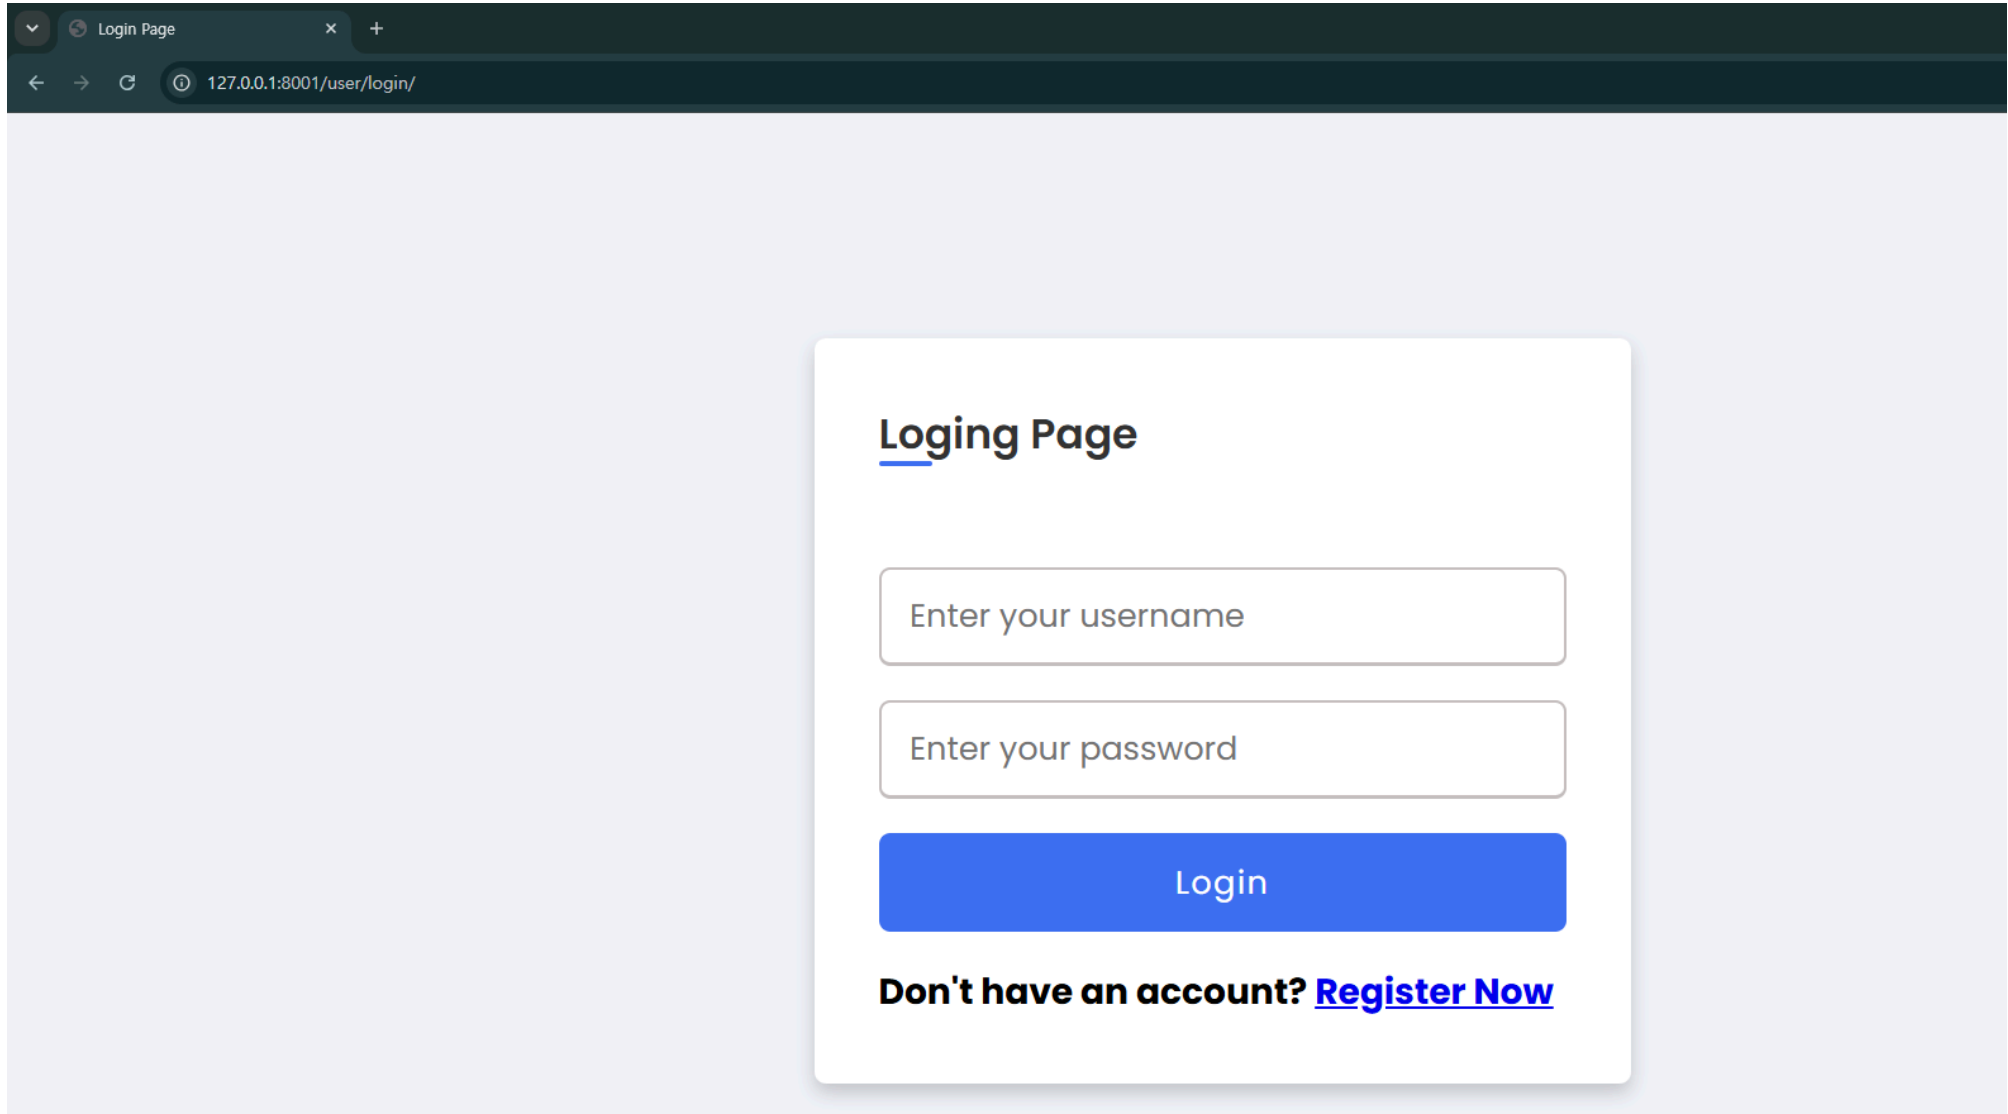

The screenshot shows a terminal window with a dark background. At the top, there are tabs for 'PROBLEMS', 'OUTPUT', 'DEBUG CONSOLE', 'TERMINAL' (which is active), 'PORTS', and 'POSTMAN CONSOLE'. In the top right corner, there is a status bar showing 'uv - django_server' with a warning icon and a plus sign. The terminal content shows a command prompt where the user has run 'uv run python manage.py runserver 8001'. The output indicates that the server is watching for file changes, performing system checks, and starting the development server at http://127.0.0.1:8001/. A yellow warning message is displayed at the bottom, advising that this is a development server and not for production use.

```
PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS POSTMAN CONSOLE uv - django_server ⚠ +
○ (django-server) PS D:\develop\github\course_github\Github Actions\Django with aws\django_server> uv run python manage.py runserver 8001
Watching for file changes with StatReloader
Performing system checks...

System check identified no issues (0 silenced).
July 19, 2026 - 13:46:21
Django version 5.2.8, using settings 'config.settings'
Starting development server at http://127.0.0.1:8001/
Quit the server with CTRL-BREAK.

WARNING: This is a development server. Do not use it in a production setting. Use a production WSGI or ASGI server instead.
For more information on production servers see: https://docs.djangoproject.com/en/5.2/howto/deployment/
```

브라우저에서 <http://127.0.0.1:8001> 접속

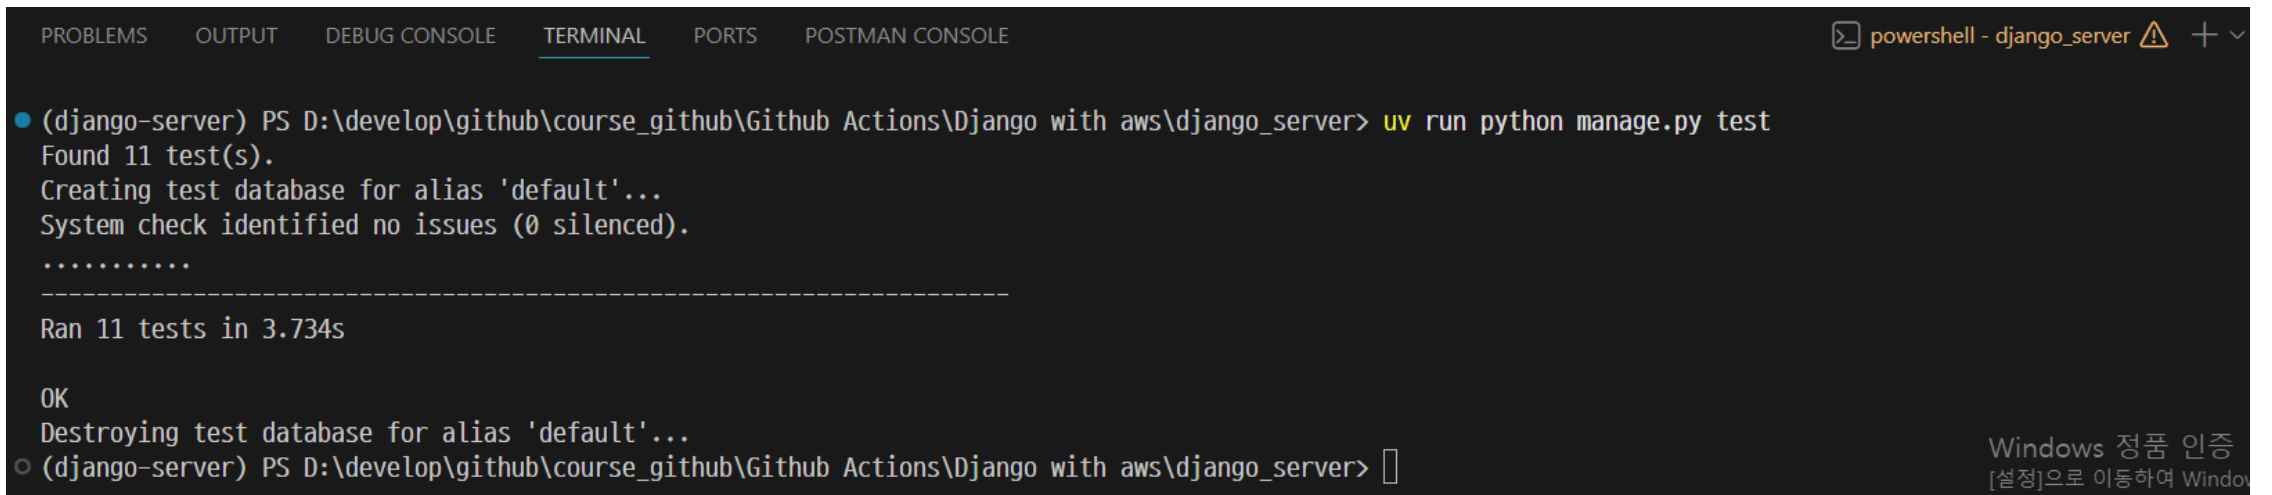

The screenshot shows a web browser window with a single tab titled "Login Page". The address bar displays the URL "127.0.0.1:8001/user/login/". The main content area features a white login form centered on a light gray background. The form is titled "Logging Page" and contains two input fields: "Enter your username" and "Enter your password". Below these fields is a blue "Login" button. At the bottom of the form, there is a link that says "Don't have an account? [Register Now](#)".

Django 서버 테스트하기

전체 앱 테스트

```
uv run python manage.py test
```

The screenshot shows a VS Code terminal window with the 'TERMINAL' tab selected. The terminal title is 'powershell - django_server'. The command executed is `uv run python manage.py test`. The output shows that 11 tests were found and passed successfully in 3.734 seconds. The terminal also shows the creation and destruction of a test database. A Windows watermark is visible in the bottom right corner.

```
PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS POSTMAN CONSOLE powershell - django_server ⚠ + v
```

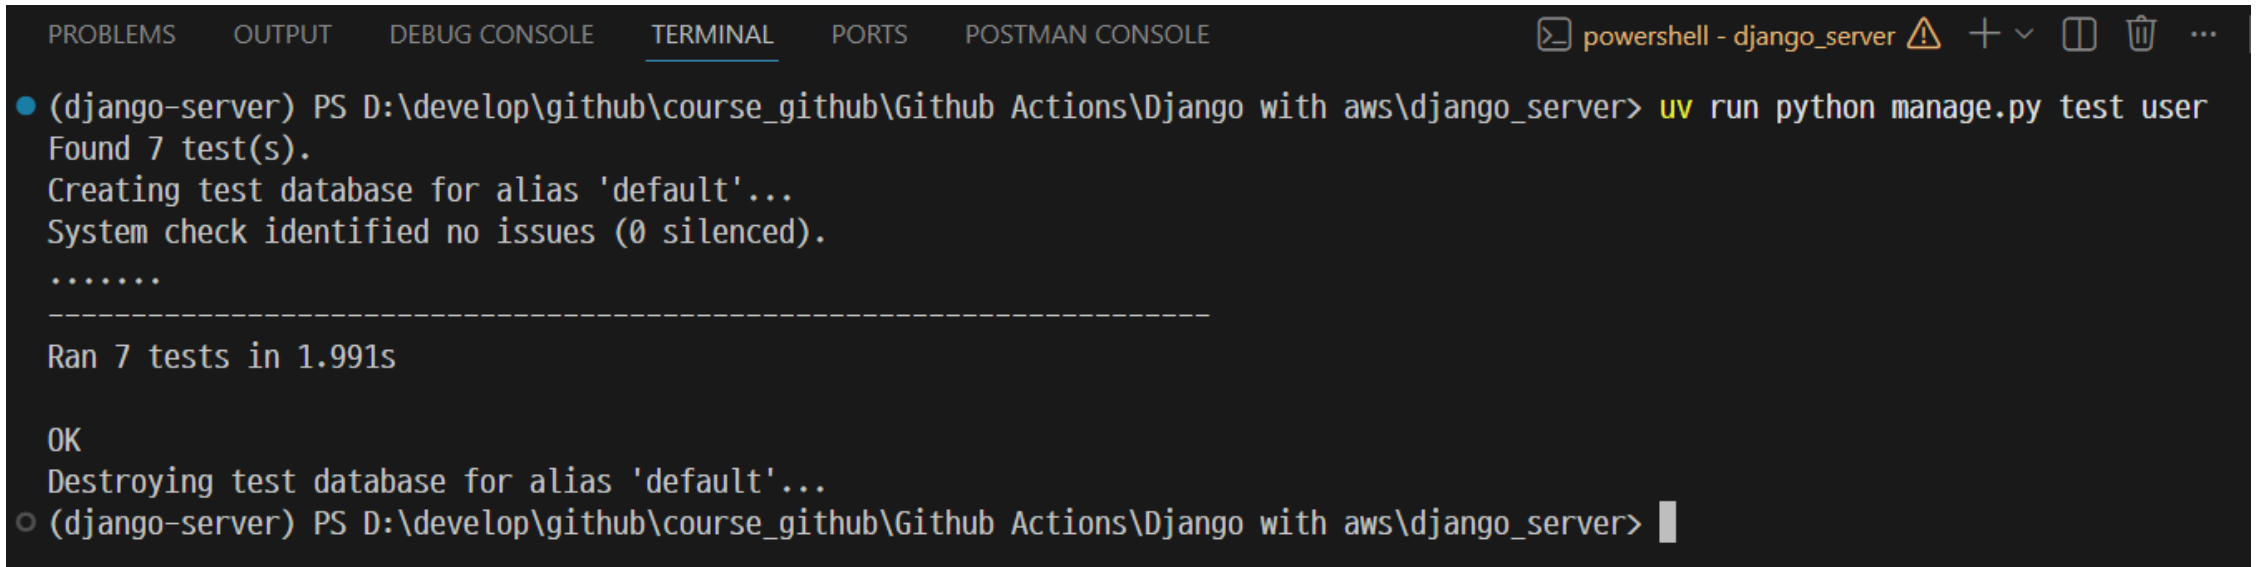

```
• (django-server) PS D:\develop\github\course_github\Github Actions\Django with aws\django_server> uv run python manage.py test
Found 11 test(s).

```

Windows 정품 인증
[설정]으로 이동하여 Window

특정 앱만 실행

```
uv run python manage.py test user
```

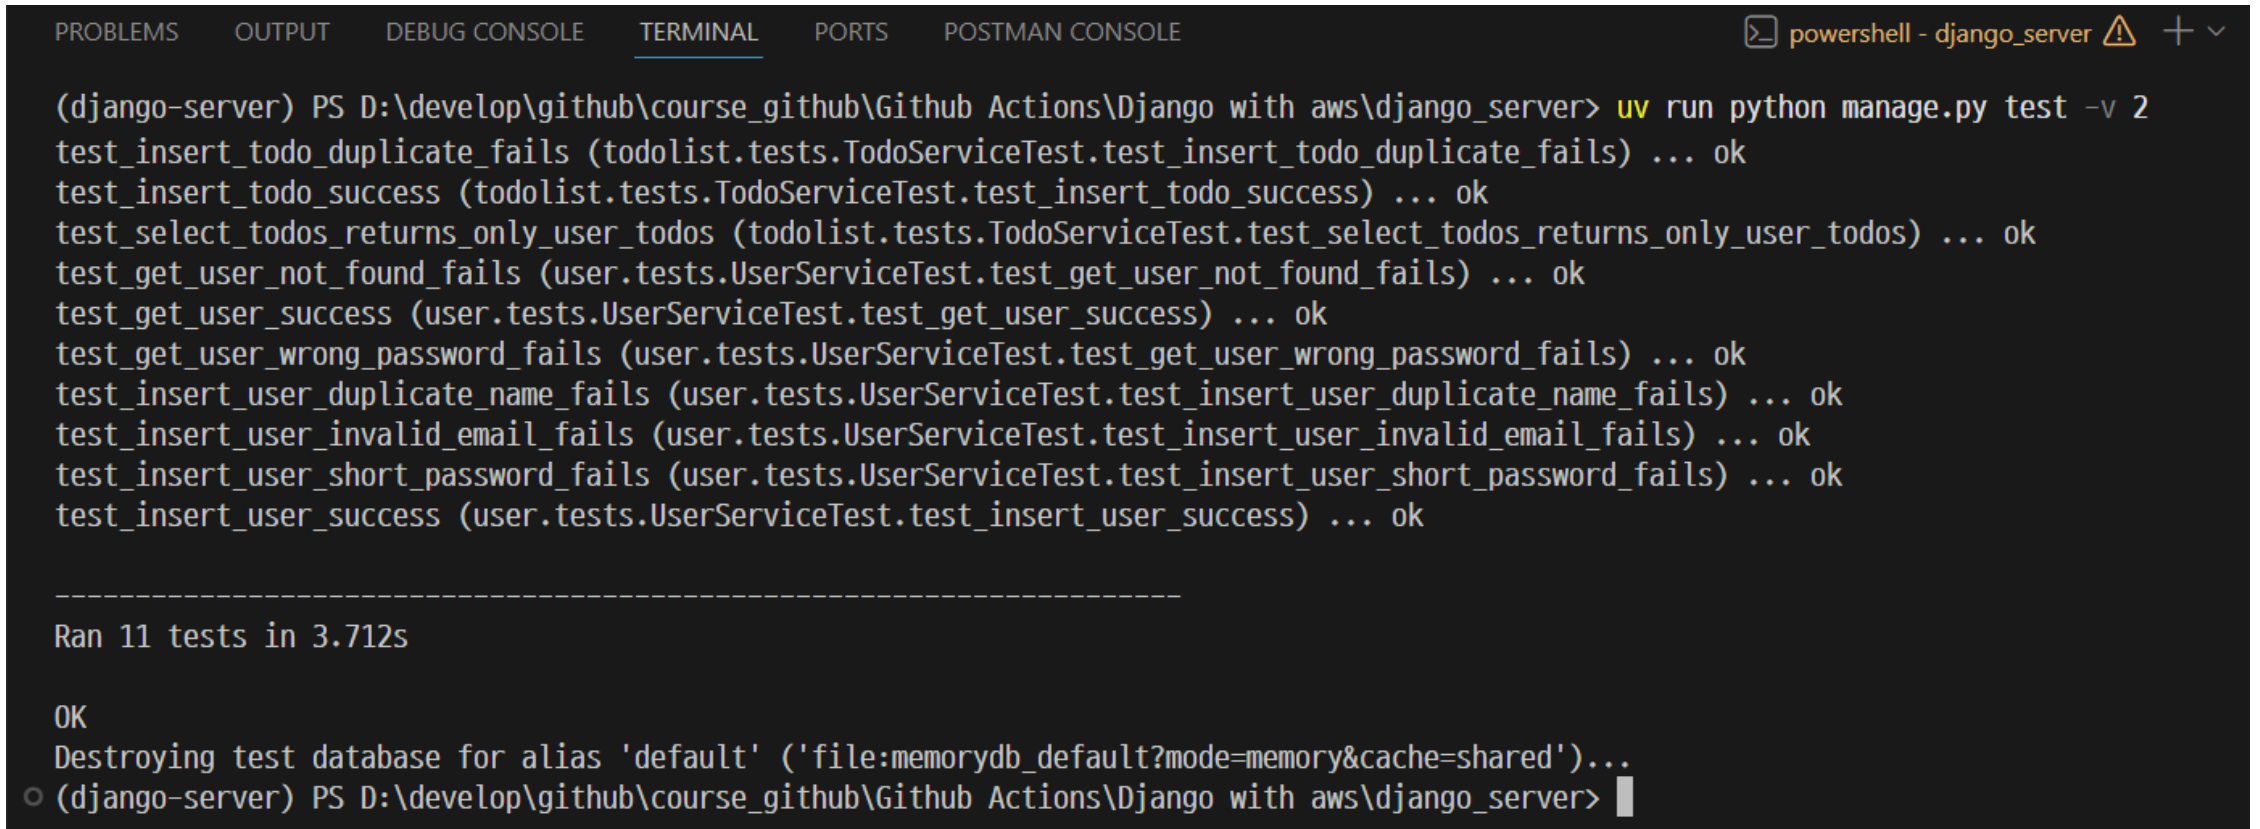

The screenshot shows a VS Code terminal window with the following tabs: PROBLEMS, OUTPUT, DEBUG CONSOLE, TERMINAL, PORTS, and POSTMAN CONSOLE. The terminal title bar indicates it is a powershell session for 'django_server'. The command being executed is 'uv run python manage.py test user'. The output shows that 7 tests were found and executed successfully in 1.991 seconds. The terminal also shows the creation and destruction of a test database for the 'default' alias.

```
(django-server) PS D:\develop\github\course_github\Github Actions\Django with aws\django_server> uv run python manage.py test user
Found 7 test(s).
Creating test database for alias 'default'...

```

실행 로그를 자세히 보고 싶을 때 (verbosity)

```
uv run python manage.py test -v 2
```

The screenshot shows a terminal window with a dark background. At the top, there are tabs for 'PROBLEMS', 'OUTPUT', 'DEBUG CONSOLE', 'TERMINAL' (which is active), 'PORTS', and 'POSTMAN CONSOLE'. The terminal title bar says 'powershell - django_server'. The command being executed is 'uv run python manage.py test -v 2'. The output shows 11 tests passing, each followed by '... ok'. The tests are: test_insert_todo_duplicate_fails, test_insert_todo_success, test_select_todos_returns_only_user_todos, test_get_user_not_found_fails, test_get_user_success, test_get_user_wrong_password_fails, test_insert_user_duplicate_name_fails, test_insert_user_invalid_email_fails, test_insert_user_short_password_fails, and test_insert_user_success. Below the tests, it says 'Ran 11 tests in 3.712s'. Then it says 'OK' and 'Destroying test database for alias 'default' ('file:memorydb_default?mode=memory&cache=shared')...'. The prompt returns to '(django-server) PS D:\develop\github\course_github\Github Actions\Django with aws\django_server> '.
